

WHAT IS ON THE FLOOR THIS WEEK

A short sample that shows a workspace’s own design system carried into a PDF.

Every colour, face and heading case on this page comes from the workspace’s token file. The document source is the house template, unchanged: a workspace without a token file builds the same source in the house look.

Slate boxes are inputs and outputs. Sage boxes are work. Rust boxes are checks.

WHAT THIS IS NOT

The numbers are made up. The placeholder system stands in until the workspace imports its own export from Claude Design.

Figures invented for the sample, 24 September 2026.
